

CNH Industrial CNH Industrial is a global leader in the capital goods sector that, through its various businesses, designs, produces and sells agricultural and construction equipment, trucks, commercial vehicles, buses and specialty vehicles, in addition to a broad portfolio of powertrain applications. Across its 12 brands, 64 manufacturing plants, 49 research and development centres and a workforce of more than 70'000 people, CNH Industrial is present in 180 countries giving it a unique competitive position.

FPT Motorenforschung AG in Arbon has around 250 highly qualified employees working with commitment and acknowledged success. Our activities: all aspects of engine research and development, particularly diesel engines with direct injection and aftertreatment systems for road vehicles and off-road applications. Investing in the future and providing new jobs, we are looking for a

Leader Proto Shops, Logistics and Facilities

Testing Support guarantees efficient use of various test cell types and rigs at a very high quality level to gain reliable testing results. Well planned and coordinated order processes in the various workshops are the key for an efficient use of various types of test cells supported by a strong logistics team. To name a few but all: build of proto parts, measurement sections, assembly of aggregates or repair of systems.

Maintaining and upgrading of buildings and infrastructure together with external companies guarantee safe and state of the art testing. The metrology lab plays an important role not only for endurance testing activities but is also responsible for the calibration of measurement and testing equipment following ISO and IATF standards.

Your tasks

- You coordinate and support all the activities between the workshops and the logistics teams.
- You maintain and improve existing infrastructure.
- You are responsible for the building access and security management.
- You specify new infrastructure together with internal and external experts and lead the projects.

Your profile

- You have a university degree in mechanical or electrical engineering, with at least 10 years of working experience of which 3 years in a leading position.
- You have knowledge in mechanical systems with basic ISO and IATF knowledge.
- You have good German and English skills (spoken and written at least C1).
- You show initiative, good communication and leadership skills, you are a team player and highly motivated
